

WEBSITE REDESIGN PROPOSAL

A modern home for skills, AI & technology.

A redesigned, mobile-first website concept for Juba Consultants — preserving everything on the current site and elevating how it looks, performs and converts.

Empowering Through Skills, AI & Technology

Prepared for: Juba Consultants (Pty) Ltd

Prepared by: Lubelo Tech Solutions

Date: 15 June 2026

MOCKUP · FOR REVIEW

1. Purpose of this document

This proposal presents a **redesigned concept** for the Juba Consultants website. It:

- Captures **everything on the current live site** so nothing is lost in the move.
- Sets out **what the redesign improves** and why.
- Makes clear that what you are reviewing is a **working mockup** — a clickable prototype to agree direction and look-and-feel.
- Lists **what we still need from Juba** (content, brand assets, accounts) to take the approved mockup to a finished, live website.

How to read the mockup: The prototype is a real, browsable website. Once you are happy with the structure, design and feel, we move into the **final development phase** where placeholder content is replaced with your real company profile, photography, copy and accounts.

2. The current website — captured in full

So nothing is lost, here is everything we recorded from the existing live site (jubaconsultants.co.za). All of this carries forward into the redesign.

Brand & message

- **Name:** JUBA CONSULTANTS
- **Tagline:** *"Empowering Through Skills, AI & Technology"*
- **Mission:** Empowering *"individuals, communities, and organizations through education, technology, and future-focused digital solutions"*, operating across Africa.
- **Values:** Innovation-driven · Community-focused · Education-centered · Future-ready

Navigation (current)

Home · About · Incubation · Skills Development & Training · AI Breakthrough · ICT & Technology Solutions · Contact

Core service offering (current)

1. **Program Development & Execution** — define objectives and execute customised social-investment initiatives.
2. **Impact Assessment & Analysis** — data-driven monitoring, reporting frameworks and strategic communication.
3. **Strategic Framework Development** — focused direction with implementation pathways.
4. **Action Plan Design** — converting vision into actionable steps, with resource optimisation and defined timelines.

Three strategic divisions (current)

Division	What it covers
Juba Skills Development & Training	SETA-accredited programmes · learnerships · corporate training · project management
AI Breakthrough	AI education & workshops · intelligent web applications · AI solution development · quantum-computing research
ICT & Technology Solutions	Custom software development · web & mobile applications · digital transformation · technology training

Business Incubation (current)

Supports *"startups, developing enterprises, and community-based businesses"* through enterprise readiness, operational structuring, digital enablement and growth support.

Contact information (current — needs confirmation, see section 6)

- **Address:** 27 Magwaza Maphalala St, Greyville, Durban, 4001, KwaZulu-Natal
- **Phone:** 068 382 5733
- **Email:** jubaskillsdev@gmail.com · jubaskillscomm@gmail.com · training.academy@jubaconsultants.co.za · sne.khathi@jubaconsultants.co.za · techdirector@jubaconsultants.co.za

3. What the redesign delivers

The redesign keeps **all of the above** but presents it through a modern, professional, fast and mobile-first experience.

Design direction — "Modern Minimal"

- Clean, confident layout with generous spacing and clear hierarchy.
- **Brand palette:** Navy #0B2E6D, Navy-dark #071d45, Gold #C9A34E.
- **Typography:** Poppins — modern, friendly, highly legible.
- Consistent, reusable component system so every page feels like one product.

What is already built in the mockup

Page	Contents
Home	Hero → about teaser → services preview → "Who We Serve" → call-to-action
About	Company story, values, founder card
Services	Full services grid
Gallery	Photo grid with click-to-zoom lightbox + video section (with poster frames)
Contact	Contact details + working enquiry form

Improvements over the current site

- **Modern, cohesive visual identity** — a single design system instead of mixed styles.
- **Mobile-first & fully responsive** — adapts cleanly from desktop → tablet → phone (3 → 2 → 1 column layouts).
- **New media Gallery** — an 8-image grid with an accessible lightbox, plus 8 short videos that load only when played.
- **Performance** — no heavy frameworks; images lazy-load; videos use lightweight poster frames.
- **Accessibility** — keyboard-navigable, visible focus states, descriptive alt text and ARIA labels.
- **Working enquiry form** — submissions handled and validated, ready to wire to Juba's inbox.
- **Maintainable foundation** — clean HTML/CSS/JS that any developer can extend.

Content from the current site → where it lives in the redesign

Current site item	Proposed home in the redesign
Skills Development & Training	Services / dedicated division page
AI Breakthrough	New division page <i>(final phase)</i>
ICT & Technology Solutions	New division page <i>(final phase)</i>
Incubation	New dedicated page <i>(final phase)</i>
4 core services	Services grid
Mission / values	About page
Contact details	Contact page + footer

Note: The mockup currently emphasises the skills-development side. To match the live site fully, the final build will add **AI Breakthrough**, **ICT & Technology Solutions** and **Incubation** as first-class sections/pages.

4. This is a mockup — what that means

The prototype exists to **agree the design and structure before we invest in the final build**. In the mockup:

- Photos and videos are **placeholders** (taken from recent sessions on a phone).
- Some copy is **drafted / illustrative**, not final approved wording.
- Contact details and social links use **placeholder values** pending confirmation.
- The AI / ICT / Incubation sections are **outlined but not yet built out**.

None of this is a limitation of the approach — it is the normal prototype stage. Once you approve direction, we replace placeholders with the real thing.

5. From mockup to final — proposed phases

Phase	What happens	Outcome
1. Review (now)	You explore the mockup and give feedback on look, structure, content	Agreed direction
2. Content & assets	Juba supplies the materials in section 6; we finalise copy	Real content ready
3. Build-out	Add AI / ICT / Incubation pages; integrate brand assets, photos, videos	Complete site
4. Polish & launch	SEO, analytics, legal pages, domain & hosting, testing	Live website
5. Handover & support	Documentation, training, optional maintenance	You own and run it

6. What we need from Juba to continue

To move from mockup to a finished, professional site, please provide the following. This is the single biggest factor in how fast and how well the final site comes together.

A. Company profile & copy

- ☐ **Official company profile** (PDF/Word) — history, mission, vision, values.
- ☐ **Final approved wording** for each service and division.
- ☐ **Founder / leadership bios** and roles.
- ☐ Any **accreditations** to display (e.g. SETA, QCTO) with reference numbers.

B. Brand assets

- ☐ **Logo files** in high resolution — ideally vector (SVG/AI/EPS) plus PNG.
- ☐ **Brand guidelines** if they exist (exact colours, fonts, usage rules).
- ☐ Confirmation of the **brand colour palette** (currently navy + gold).

C. Photography & video

- ☐ **Professional photos** of the team, offices, workshops and events (the mockup uses phone snapshots as placeholders).
- ☐ **Team headshots** (consistent style).
- ☐ Any **promotional / training videos** to feature.
- ☐ Permission/consent for any images of identifiable people.

D. Contact details — please confirm

We found **different contact details** between the live site and earlier project files. Please confirm the correct, current details:

- ☐ **Phone number(s)** — live site shows 068 382 5733; project files show +27 79 351 7376.
- ☐ **Physical address** — live site shows *27 Magwaza Maphalala St, Greyville*; project files show *57 Magwaza Maphalala St, Berea*.
- ☐ **Official email address(es)** — which should be public, and where enquiries should land.

E. Social media & online presence

- ❑ **Social media handles / links** — LinkedIn, Facebook, Instagram, X, YouTube, etc. (footer icons are currently placeholders).
- ❑ **Google Business Profile** link / map location for the contact page.
- ❑ Any **WhatsApp business** number for a quick-contact button.

F. Accounts & technical

- ❑ **Domain** access (jubaconsultants.co.za) and **hosting** preference.
- ❑ **Enquiry-form destination** — email inbox and/or a form service account.
- ❑ **Analytics** preference (e.g. Google Analytics) to track visitors.
- ❑ Decision on whether you want a **content editor (CMS)** to update text/news yourself.

G. Legal & compliance

- ❑ **Privacy Policy** and **Terms** content (or approval for us to draft, incl. POPIA).
- ❑ Cookie/consent requirements if analytics or forms collect data.

7. Optional additions worth considering

These are not in the current site but would strengthen the final product:

- **Testimonials / client logos** — social proof from past programmes.
- **News / blog or "Insights"** section — useful for SEO and showing activity.
- **Case studies / impact stories** — concrete outcomes from training & incubation.
- **Newsletter sign-up** — build a contact list.
- **Downloadable resources** — brochures, programme catalogues, application forms.

8. Summary

- The redesign **preserves everything** on the current site and presents it in a modern, fast, mobile-friendly, accessible package.
- What you are reviewing now is a **mockup** — the moment to shape direction.
- On approval, we proceed to the **final build**: real content, the AI / ICT / Incubation sections, brand assets, photography, and launch.
- The **fastest path forward** is providing the materials in section 6 — especially the company profile, confirmed contact details, social handles, logo files and professional photos.

Next step: review the mockup and share feedback, then send through the section 6 checklist so we can begin the final development phase.
