

SOCIAL MEDIA CONTENT PLAN

Building the brand across every feed.

A practical, sustainable content plan for Instagram, Facebook, TikTok and LinkedIn — built to grow awareness of Juba Consultants as the Skills, AI & ICT brand, at a pace a small team can keep.

Driving Innovation. Building Capacity. Transforming Futures.

Prepared for: Juba Consultants (Pty) Ltd

Prepared by: Lubelo Tech Solutions

Date: 26 June 2026

GOAL · BRAND AWARENESS

1. Goal & approach

The objective is **brand awareness**: make Juba Consultants recognised across South Africa as the integrated **Skills Development · AI · ICT** brand.

- **All four platforms stay active**, each with a distinct role (section 4).
- **Operating model**: plan once a month, post once a week — one "hero" post per week, repurposed across all four platforms (section 6).
- **Consistency over volume**: the same look, voice and weekly rhythm build recognition faster than sporadic bursts.

2. Who we're talking to

Audience	What they want to see
Youth & learners	Programmes, "apply now", learner stories, day-in-the-life, free tips.
Government / SETAs / corporates	Accreditation, results, thought leadership, B-BBEE & skills value, professionalism.
SMMEs & partners	Incubation, ICT services, collaboration, the JUBA LMS.
Community	Events, impact, people, proudly-South-African moments.

3. Brand voice & visual identity

Voice

Aspirational, expert-yet-accessible, empowering and proudly South African. We explain (never lecture), we celebrate people, and we make technology feel within reach.

Look

- **Colours**: Navy #0B2E6D · Gold #C9A34E · white. **Font**: Poppins.
- **Templates**: use 3–4 consistent post templates (quote, tip, spotlight, event) so the feed is instantly recognisable.
- **Real over stock**: lead with your own event photos and videos. Add a small JUBA logo/gold accent to every graphic.
- **Sign-off**: end captions with *"Driving innovation. Building capacity. Transforming futures."*

4. Platform roles

Platform	Role	Format focus	Cadence
LinkedIn	Credibility & B2B reach (gov, SETA, corporate, partners)	Text posts, document carousels, thought leadership, team & wins	1 / week
Instagram	Visual storytelling & the "shop window"	Reels, carousels, stories	1 / week (+ stories)
Facebook	Community & local (Durban/KZN) reach	Shareable posts, events, photo albums	1 / week (repurposed)
TikTok	Reach & younger audience	Short, hook-first educational/relatable video	1 / week (repurposed reel)

5. Content pillars

Every post belongs to one of six pillars. Suggested mix for awareness in brackets.

PILLAR 1 · 20%

Skills & Training

Learnerships, programmes, SETA/QCTO, "what is a learnership", intakes & deadlines.

PILLAR 2 · 20%

AI Made Simple

Demystifying AI, free tools, quick tips, "AI for everyone" — your AI Breakthrough division.

PILLAR 3 · 15%

ICT & Innovation

The JUBA LMS, software projects, behind-the-scenes builds, digital transformation.

PILLAR 4 · 30%

Impact & People

Learner & graduate stories, events, the team, testimonials — your strongest awareness driver.

PILLAR 5 · 10%

Thought Leadership

Skills development, youth employment, the digital economy, B-BBEE — LinkedIn-led.

PILLAR 6 · 5%

Brand & CTA

Who we are, the three divisions, "enquire / partner / enrol", milestones.

6. Operating model: plan monthly, post weekly

Your rhythm: a short monthly planning session, then one post per week — published and repurposed across all four platforms.

① Monthly planning session — once a month (~1–2 hours)

- Pick the month's **theme** and the **4 weekly posts** (one per week), rotating across pillars.
- **Batch-create** all four assets in one sitting (shoot/design together).
- Write the four captions and **schedule** them (Meta Business Suite / Buffer).
- Refresh the idea backlog for next month.

② Weekly post — once a week

- One "hero" post goes out each week, **adapted to each platform** (section 9).
- Optional: light stories / behind-the-scenes (#ThroughTheLens) and ~10 minutes of daily engagement.

Monthly pillar rotation (one post per week)

Week	Focus	Pillar	Format → platforms
Week 1	Brand / who we are	Brand	Carousel / graphic → all 4
Week 2	Educate — AI tip or skills spotlight	AI / Skills	Reel → all 4
Week 3	Impact & people (your strongest)	People	Carousel / Reel → all 4
Week 4	Innovation or thought leadership	ICT / Thought	Project showcase / LinkedIn-led → all 4

7. Sample month — one post per week

Four posts, planned in one session — brand → educate → people → innovation.

Week	The post	Pillar → platforms
Week 1	"We are Juba" — the three divisions (carousel)	Brand → IG, FB, LinkedIn, TikTok
Week 2	AI Made Simple: "3 free AI tools to try this week" (reel)	AI → IG, TikTok, FB, LinkedIn
Week 3	#FeatureFriday: a learner / graduate story (event footage)	People → IG, FB, LinkedIn, TikTok
Week 4	Project showcase: the JUBA LMS — or a thought-leadership piece	ICT / Thought → LinkedIn, IG, FB

Next month, rotate the topics: keep the same four-week shape (brand → educate → people → innovation) with fresh content, so the brand stays consistent and the story keeps moving.

8. Caption framework & examples

Every caption: **Hook → Value → Call-to-action → branded sign-off + hashtags.**

LINKEDIN · THOUGHT LEADERSHIP

South Africa doesn't have a shortage of talent — it has a shortage of access.

At Juba Consultants, every learnership and skills programme we run is about closing that gap: turning potential into qualifications, and qualifications into employment.

That's what "building capacity" means to us. 📌 What's the biggest skills gap you see in your sector?

Driving innovation. Building capacity. Transforming futures.

#SkillsDevelopment #YouthEmployment #SouthAfrica #Learnerships

INSTAGRAM · CAROUSEL (AI MADE SIMPLE)

AI isn't just for big tech companies. 🤖 Swipe for 3 free AI tools you can start using this week →

At AI Breakthrough, we make artificial intelligence understandable and useful — for students, businesses and communities.

💬 Save this for later and tell us which one you'll try first.

#AIBreakthrough #AIforEveryone #DigitalSkills #Durban #JubaConsultants

TIKTOK / REEL · #FEATUREFRIDAY

[Hook, first 2s]: "This is what a graduation feels like at Juba. 🎓 "

[Show]: quick cuts of the event, learners, the moment.

[Text on screen]: From learnership → qualification → opportunity.

[End card]: Your future could be next. Link in bio.

#TransformingFutures #SkillsDevelopment #SouthAfrica #fyp

9. Work smart: create once, post everywhere

One weekly post should reach all four platforms — adapt, don't recreate.

- **A video post** → IG Reel + TikTok + Facebook (+ LinkedIn if relevant) — trim captions/hashtags per platform.
- **A graphic / carousel** → Instagram + LinkedIn (as a document) + Facebook.
- **A written / thought piece** → LinkedIn-native, shortened for Facebook, and turned into an on-brand quote graphic for Instagram.

Create all four of the month's posts in your monthly planning session, then schedule them with a free tool (Meta Business Suite for IG + FB; Buffer for all four).

Hashtag bank

Brand: #JubaConsultants #DrivingInnovation #BuildingCapacity #TransformingFutures

Skills: #SkillsDevelopment #Learnerships #SETA #QCTO #YouthEmployment #SkillsForJobs

AI & ICT: #AIBreakthrough #AIforEveryone #DigitalSkills #ICTSolutions #DigitalTransformation #EdTech

Local: #Durban #KZN #ProudlySouthAfrican #SouthAfrica #SMME

Use 5–10 on Instagram, 3–5 on LinkedIn, 3–5 on TikTok (incl. one broad reach tag), 2–3 on Facebook.

10. Measuring awareness

Review monthly. For awareness, watch reach and growth more than likes.

Metric	Why it matters
Reach / impressions	How many people saw you — the core awareness number.
Follower growth	Audience building over time.
Engagement rate	Quality of connection (likes + comments + shares ÷ reach).
Shares & saves	Strongest awareness signal — others spreading your content.
Video views / completion	Reel & TikTok performance.
Profile visits & website clicks	Intent — people going deeper.

11. Quick-start checklist

- Secure consistent handles & identical bios across IG, FB, TikTok, LinkedIn (logo profile pic, gold accent).
- Add a "link in bio" (website + key pages) via a simple link hub.
- Build 3–4 branded post templates (quote, tip, spotlight, event).
- Connect Instagram + Facebook in Meta Business Suite for scheduling.
- Hold the **monthly planning session** (1–2 hrs): set the theme, plan the 4 weekly posts, batch-create the assets and captions, and schedule them.
- Post **once a week**; repurpose each post across all four platforms.
- Engage ~10 minutes daily: reply to comments, follow & comment on partners (SETAs, Moses Kotane, local orgs).
- Review metrics at month-end (in the next planning session); double down on what reached most.
